BMW 1 SERIES

OCTOBER 2019 - ONWARDS All Variants

BMW 1 SERIES

OVERVIEW

The BMW 1 Series was introduced in Australia and New Zealand in October 2019. This ANCAP safety rating applies to all variants.

Dual frontal, side chest-protecting and side head-protecting (curtain) airbags are standard.

Autonomous emergency braking (City, Interurban and Vulnerable Road User), and lane keep assist (LKA) with lane departure warning (LDW), are standard on all variants. ANCAP SAFETY RATING RATING YEAR (DATESTAMP) VEHICLE TYPE AIRBAGS ****

2019 SMALL CAR Dual frontal, side chest, side head

RATING APPLICABILITY

VARIANT	BODY TYPE	ENGINE	DRIVETRAIN	AUS	NZ
BMW 1 Series 118i M Sport	5 door hatch	1.5 litre petrol	FWD	\checkmark	\checkmark
BMW 1 Series M135i xDrive	5 door hatch	2.0 litre petrol	AWD	\checkmark	\checkmark

ADULT OCCUPANT PROTECTION

The passenger compartment remained stable in the frontal offset test. Dummy readings indicated ADEQUATE protection for the driver's chest and the lower legs of both the driver and front passenger. Protection for all other critical body regions was GOOD.

In the full width frontal test, chest protection was ADEQUATE for the driver and WEAK for the rear passenger, with GOOD protection of all other critical body areas.

In the side impact test and the oblique pole test, protection offered to all critical body regions was GOOD and the vehicle scored maximum points in these tests.

The autonomous emergency braking (AEB) system scored maximum points with GOOD performance in low-speed test scenarios typical of city driving. However, the points for AEB City were not awarded as front head restraint performance in the Whiplash test must be GOOD in order to earn the additional points for active safety.

Score: 0.00 points

FULL WIDTH FRONTAL TEST (50 KM/H)

CHILD OCCUPANT PROTECTION

In the frontal offset and side impact tests, protection of the 10 year and 6 year dummies was GOOD and maximum points were scored in these tests.

The BMW 1 Series is fitted with lower ISOFix anchorages on the rear outboard seats and top tether anchorages for all rear seating positions.

Installation of typical child restraints available in Australia and New Zealand showed most child restraints could be accommodated in most rear seating positions, though one of the selected booster seats could not be correctly installed in the centre rear seating position.

* Installation of each child restraint is assessed separately in each position. Installation of multiple restraints has not been assessed and may not be possible. ^ The above list of child restraints has been selected to provide a general indication of the rated vehicle's ability to accommodate various CRS types. ANCAP does not endorse or recommend any one CRS brand or model, nor does it rate the safety of child restraints.

× INSTALLATION NOT ALLOWED - NOT APPLICABLE / NOT ASSESSED

VULNERABLE ROAD USER PROTECTION

The BMW 1 Series has an 'active' bonnet. Sensors detect when a pedestrian is struck and actuators lift the bonnet to provide greater clearance to stiff components in the engine bay. The 1 Series was tested with the bonnet in the raised position and GOOD or ADEQUATE results were recorded over most of the bonnet area with some POOR results recorded around the windscreen pillars and the base of the windscreen.

Protection of the pelvis was mixed, with areas of GOOD and POOR performance, while the bumper provided mostly GOOD protection to pedestrians' legs with some ADEQUATE results seen on the outer edges of the bumper.

The AEB system offered GOOD performance in tests of its effectiveness in pedestrian test scenarios under both daylight and night-time conditions. GOOD performance was also seen in cyclist test scenarios with collisions avoided or mitigated at most test speeds.

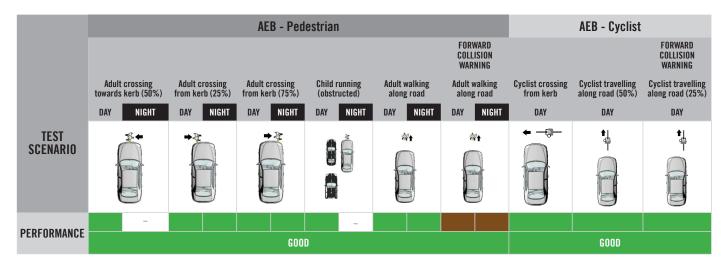

HEAD IMPACTS	17.34	(out of 24)

SAFETY ASSIST

The BMW 1 Series is fitted with autonomous emergency braking (AEB) and a lane support system (LSS) with lane departure warning (LDW) and lane keep assist (LKA).

Tests of the AEB system in highway speed scenarios showed GOOD performance with collisions avoided or mitigated in all scenarios.

Tests of the LSS functionality showed ADEQUATE performance in lane keep assist (LKA) tests, however the system does not intervene in more critical emergency lane keeping (ELK) scenarios and overall performance was classified as MARGINAL.

A speed assistance system (SAS) is also standard, informing the driver of the local speed limit and allowing the driver to set the speed accordingly.

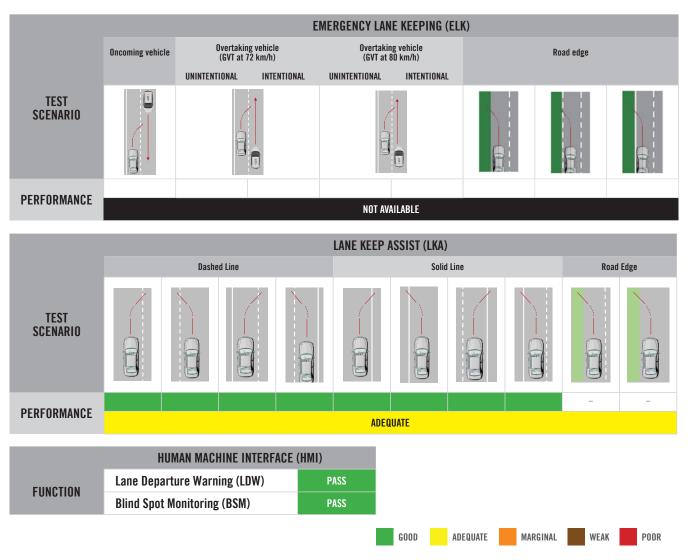

A seatbelt reminder system is fitted for all front and rear seating positions.

MODEL VARIANTS:

ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on the extension of a rating to additional variants of a model.

RATING YEAR (DATESTAMP):

Automatic high beam

The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and, for vehicles rated from 2018, the Rating Year is the year in which the vehicle was tested.
