VOLKSWAGEN T-CROSS

OVERVIEW

The Volkswagen T-Cross was introduced in Australia and New Zealand in April 2020. This ANCAP safety rating applies to all variants.

Dual frontal, side chest-protecting and side head-protecting (curtain) airbags are standard.

Autonomous emergency braking (City, Interurban and Vulnerable Road User), and a lane support system with lane keep assist (LKA), lane departure warning (LDW) and emergency lane keeping (ELK), are standard on all variants.

ANCAP SAFETY RATING	★★★★★

ADULT OCCUPANT PROTECTION

97%

36.89 POINTS
OUT OF 38

The passenger compartment remained stable in the frontal offset test. Dummy readings indicated MARGINAL or ADEQUATE protection for the lower legs of both the driver and front passenger. Protection for all other critical body regions was GOOD.

In the full width frontal test, protection was ADEQUATE for the neck and chest of the rear passenger and GOOD for all other critical body regions for both the driver and rear passenger.

In the side impact test and the oblique pole test, protection offered to all critical body regions was GOOD and the Volkswagen T-Cross scored maximum points in these tests.

The autonomous emergency braking (AEB) system scored maximum points with GOOD performance in low-speed test scenarios typical of city driving.

41.77 POINTS
OUT OF 49

In the frontal offset test, neck tension in the 10 year dummy indicated MARGINAL protection and the chest results indicated ADEQUATE protection. Protection offered to all other critical body regions of both the 6 and 10 year dummies was GOOD.

In the side impact test, protection of all critical body areas was GOOD for both child dummies.

The Volkswagen T-Cross is fitted with lower ISOFix anchorages on the rear outboard seats and top tether anchorages for all rear seating positions.

Installation of typical child restraints available in Australia and New Zealand showed most child restraints could be accommodated in most rear seating positions, though one of the selected booster seats could not be correctly installed in the centre rear seating position, and one of the convertible seats could not be correctly installed in rearward-facing mode using the ISOfix anchorages.

VULNERABLE ROAD USER PROTECTION

81%

38.89 POINTS
OUT OF 48

The bonnet of the Volkswagen T-Cross provided GOOD or ADEQUATE protection to the head of a struck pedestrian over most of its surface, with POOR results recorded only on the stiff windscreen pillars. Protection of the pelvis was mixed, with areas of GOOD and POOR performance.

The bumper scored maximum points for its protection of pedestrians' legs, with GOOD results at all test locations.

The autonomous emergency braking (AEB) system is capable of detecting and reacting to vulnerable road users such as pedestrians and cyclists. The AEB system offered GOOD performance in tests of its effectiveness in pedestrian test scenarios under both daylight and night-time conditions. GOOD performance was also seen in cyclist test scenarios with collisions avoided or mitigated at most test speeds.

HEAD IMPACTS	16.70	(out of 24)

The Volkswagen T-Cross is fitted as standard with a range of safety assist features including autonomous emergency braking (AEB) and a lane support system (LSS) with lane keep assist (LKA) and emergency lane keeping (ELK) functionality.

Tests of the AEB system in highway speed scenarios showed GOOD performance with collisions avoided or mitigated in all scenarios. Overall, effectiveness of the AEB system performance in highway speed scenarios was rated as GOOD.

Tests of LSS functionality showed GOOD performance, with the system intervening in some of the more critical emergency lane keeping (ELK) test scenarios.

A driver-set speed limiter is standard equipment. A speed limit information function (SLIF) is not available.

A seatbelt reminder system with occupancy detection is fitted to all seating positions.

● STANDARD ● NOT AVAILABLE ON BASE VARIANT BUT STANDARD OR OPTIONAL ON HIGHER VARIANTS ○ OPTIONAL ✕ NOT AVAILABLE

MODEL VARIANTS:

ANCAP safety ratings do not automatically extend to variants that have different body styles, engine configurations, driven wheels or occupant restraint systems (e.g. fewer airbags). In these cases, ANCAP considers technical evidence submitted by manufacturers before deciding on the extension of a rating to additional variants of a model.

RATING YEAR (DATESTAMP):

The Rating Year denotes the year requirements against which a vehicle has been assessed. The Rating Year is determined by ANCAP and, for vehicles rated from 2018, the Rating Year is the year in which the vehicle was tested.
